## Navigating Jupyter Notebook

Source: <https://www.codecademy.com/article/how-to-use-jupyter-notebooks>

- This is your Jupyter Notebook Interface

- To create a new notebook, go to New and select Notebook - Python 3. If you have other Jupyter Notebooks on your system that you want to use, you can click Upload and navigate to that particular file.
- Notebooks currently running will have a **green** icon, while non-running ones will be **grey**. To find all currently running notebooks, click on the **Running** tab to see a list.

- To close the particular Jupyter Notebook, click on **Shutdown** button.
- To close the entire Jupyter Notebook, click on **Quit** button.
